Congratulations! Your Aadhaar-Bank Mapping has been done.

Aadhaar Number	XXXXXXXXXXXX
Bank Name	CANARA BANK
Bank Seeding Status	Active ✔
Last Updated Date	XXXXXXXXXX

In case where Bank Seeding Status is showing as Inactive, Scholar needs to visit their Bank Branch in order to seed their Aadhar Number to their Bank account. It generally takes 48-72 hours for NPCI mapping of Aadhar.

On Aadhaar linking completion in scholar corner and Aadhaar seeding completion in beneficiary the payment mode will be updated for the scholar. Scholar can check in “My profile “ section in scholar corner and Nodal Officer and UGC can check in “Search student” option.

Beneficiary code reinitiation

A new functionality has been developed in portal for Reinitiating the Beneficiary Code creation based on Aadhaar if earlier failed due to “UID NEVER ENABLE(D) FOR DBT or UID IS DISABLE FOR DBT” reason.

This option will be shown on all the scholars’ scholar corner screen who have not seeded their aadhar with their bank accounts or whose aadhar is not enabled for DBT. Those scholars have to properly seed their aadhar with their bank account and get their aadhar enabled for DBT at their bank branch and after this they have to send the Beneficiary code reinitiation request through this option on Scholar’s Corner.

The screenshot displays the Scholar's Corner portal interface. At the top, there are navigation links: Grievance, Academic-Milestone, Help, and Contact. A "New feature of" label is visible in the top right corner. The main content area is divided into two sections: "Student Details" and "Aadhaar Based Beneficiary Code Update".
